Unfyros Biography

Following the Labyrinthine Voices rising from Totemic Depths and guided by the Fire from Beyond since 2018

Unfyros is a Finnish, Oulu-based, black heavy metal band founded in 2018 by *Anti Ittna H.* who was joined by *Nox Vector* on drums in 2021.

Breaking through the ideals of today's world and opening the dark vault within where total experiences and pure Power awaits

Tempered by the blazing *otherworld fire* we move on with determination and follow the unuttered and unwritten doctrines. Thus the name *Unfyros*; an entity possessing and pervading, a *liminal fire* seeing through the space and time eternal. The *luminous darkness* calling and devouring One and All.

"From the very beginning the main purpose of starting Unfyros was to give a solid form for the numerous tunes and voices calling and haunting me endlessly in the dark of the night. Thinning the Veils between worlds and answering to the Call of the Concealed".

Unfyros is about breaking ourselves open to the deep-rooted *hidden passages*, communicating and bringing out the voice and form of the *metaphysical entities* lurking behind the veils – *The amorphous Dark Ones* in a lack of a better word. We work as both the master and slave with the reflections arising from the *outré dimensions* and depths of the *atavistic-consciousness*. We are hunters and gatherers, unyielding seekers without a fixed target.

In its entirety, Unfyros is no less than a lasting stream of Power and Lunacy; a quest of forging the self through the awakened knowledge and experience. A form of archaic magical practice focusing on a change of reality. We stand dead still at the threshold of an ancient storm, rational minds bypassed yet wide awake and instincts alert.

The darkness humming - The extinct dimensions live now in you

Musically Unfyros could be described as a mixture of old-school, mid-tempo black and heavy metal with a strong emphasis on dark, hypnotic and menacing atmospheres through captivating, eerie melodies and haunting passages. Therefore if genres or other classification is necessary be it *"Black Heavy Metal"*.

"Our tunes of old sorcery are evoked, received and translated during many years and the recent lyrical themes have been transcribed from various metaphysical journeys and primitive automatic vocal seancés".

The songs are culminating on mind altering dissonant guitar riffs, minimal yet heavy bass lines and powerful, bestial drumming. These all have been tied together by subtle synth tapestries and raspy vocals flowing out like an obscure black swarm of *ghost daggers*.

With all our work we strive to do everything with the seriousness it deserves - to us Unfyros is a lifelong ritual. A tool we use to reach out toward *unknown dimensions* and to merge ourselves with the *otherworld continuum*. We are the messengers of *Nightfall, the Primeval Game - The Quintessence*.

On behalf of Unfyros,

Anti Ittna H. & Nox Vector - Oulu, Finland, 30.9.2022
